

Test Sample PDF

This is a test sample so you can check that your printer will print out the packs.
If you have any problems then you will not be able to print out the packs successfully.

Follow the instructions below:

- 1). Here you should see a picture of a train.
If it appears as a black blob when printing then you need to install a newer version of Acrobat Reader - version 4.0 or higher.
Follow the links on the site for this **free** download.

- 2). The line below should be 10.4 cm long. Measure it.

If it is different from the above length go to your print dialogue box and deselect (so there is no tick) 'Fit to Page' option. This is important if there are any measuring exercises.

- 3). At the bottom of the page you should be able to see 2 footers.

Can you see this Level x Pack 7. Page 3. and help@www.10ticks.co.uk

If you can't see these then it could be that the printer driver you have installed isn't the latest. Check the manufacturers website for the latest update

- 4). Other problems. There is a more comprehensive troubleshooting guide on our website.

The most common solution is to install the latest printer driver
